<u>Criteria Used in Marking the Reports</u>

<u>Content 80%</u>

Is an appropriate method (including computer program) adopted?

Does the explanation of the method indicate the student's understanding?

Are the derivation of the parameters in the model explained?

Is the analysis valid?

Are the prediction results (including the computer program) accurate?

Are there discussions on the source of error?

Does the first paragraph give a good introduction?

Does the last paragraph give a good conclusion?

Are figures used adequately to illustrate the content?

Bonus for authors' doing independent investigations or showing enthusiasm in the subject.

<u>Style 20%</u>

Is the format correct (double space, 12 point font, 3 pages for the content, excluding title, figures, tables, reference list and appendices)?

Are there references to the adopted method, and are the references referred to at the appropriate locations of the text?

Are the figures referred to at the appropriate locations of the text?

Are typos and grammatical mistakes eliminated?

Are appendices, if any, properly used to explain the more technical content?
